October 13, 2025: On the Ongoing Attempts to Entrap Me by Use of Official Oppression

I am writing today to document the ongoing attempts by agents and operatives that have access to the advanced surveillance state technologies to maliciously engage in my life in an attempt to 'walk' my virtues into a placement of a chargeable offense.

I am documenting the active efforts to use official oppression from malicious spying activities to actively engage in my life to cause me greater and greater discomfort, to cause me to react against them on a daily basis, and to engage with my home in a way that causes me to grow increasingly separated from the United States government.

I have already detailed the origin of these methods as deriving from the campaign of Donald Trump for President, and I am continuing to document their ongoing efforts to use their illegal spying and oppression to cause 'extremism' and reaction against them - to which they are responding as 'victims' of aggression.

These forces are using their 'secret' insider status to present themselves as an ongoing threat against our home while hiding their identities and discouraging any reporting of their activities as being 'fictitious' or imagined realities because - of course - the United States government would *never, ever,* involve themselves in *anything* illegal - so help their god.

The truth is that these insider forces are actively attempting - each and every day - to engage maliciously with my life and my home in a manner that causes me to engage in the natural defenses of 'fight or flight' from the perceived threat - which is made very clear to me to be originating from Donald Trump's mind and then to be placed into my home life by his extended resources.

I am also experiencing 'sign' language admissions from his team to the effect that they are gaining 'joy' from their experience of 'clogging' my life with their team and forcing me to react to their presence on a daily and ongoing basis. The latest admissions state that the 'Clog' joy is 'walking' the small shepherd.

I am writing these statements as factual recordings of the experiences that I am facing now as we move deeper and deeper into the illegal operations that have accompanied the rise of Donald Trump's power in the United States.

Each day, for years, now, I awake to an ongoing experience of a team of people that are being fed information from a source of spying technology. This team of people is being fed information to maneuver themselves around my home, and personal presence in ways that 'prove' that I am being spied upon, and that 'threaten' to oppress me, slow my progress, or engage with me in negative ways.

We have experienced numerous different paths of manifestation of real world harm being caused by these threats. These real world harms are barely able to fit into a category of 'plausible deniability' for the purposes of holding anyone specifically accountable, and are very clearly being made against our home with 'signs' that they are originating from the 'symbolic' rituals of the Masons and Freemasons community as well as a community of people associated with United States military veterans, fire departments, and police departments.

I am publicly testifying that a large conglomerate of criminal activity is being governed from within the sphere of Donald Trump's presence and it is stemming outward to include coordinated actions by law enforcement, first responders, military veterans, and teams of citizens that both are and are not aware of the true nature of their activities.
